Application Scenarios

Customize VNNOX by setting the URL, name, copyright, logo, etc.

Related Operations

Before customizing a domain name, please ensure that you own the domain name and have the domain name successfully filed in the Ministry of Industry and Information Technology of the People's Republic of China.

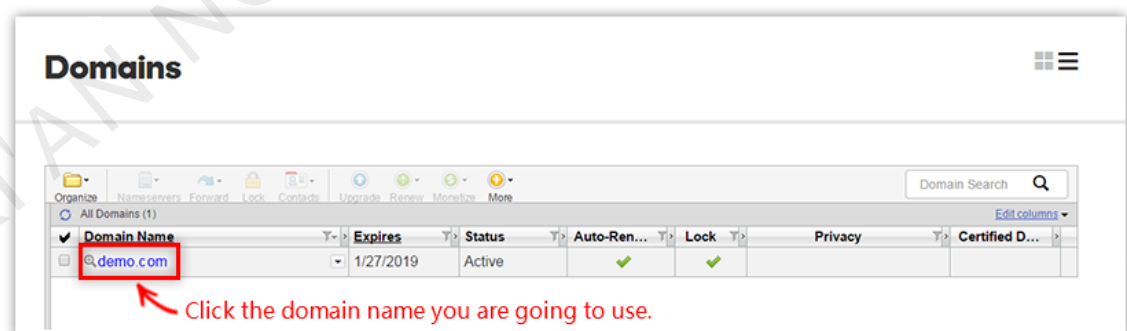

Alibaba Cloud filing service: <https://beian.aliyun.com>

Below is the procedure to customize a domain name in GoDaddy.

- Step 1 Visit the website of your domain name provider, sign in to your account and enter the domain name management control (or control panel, user center, etc.).

- Step 2 Click the domain name to access the configuration page.

- Step 3 Add a parsing record and save the configuration.

- Record type: CNAME
- Host: @
- The record value is based on your node.
 - China: cname-cn.vnnox.com
 - US: cname-us.vnnox.com

- Japan: cname-jp.vnnnox.com
- Europe: cname-eu.vnnnox.com
- India: cname-in.vnnnox.com
- Australia: cname-au.vnnnox.com

If you want to use the second-level domain name of the current domain name, fill the second-level domain name in the **Host** field.

The screenshot shows the 'Add Zone Record' interface for the domain 'demo.com'. On the left, the 'Zone File' section has a red box around the 'Add Record' button. On the right, the 'Add Zone Record' form for 'LIGHTKINGCARE.COM' has a red box around the 'Record type' (CNAME), 'Host' (www.vnnnox.com), and 'Points to' (@) fields. The 'Finish' button is also highlighted with a red box.

Operating Procedure

- Step 1 From the navigation bar on the left, choose **System Settings** > **Custom Domain Name**.
- Step 2 In the **Style** area, select a theme for the navigation bar and set an enterprise logo.
- Step 3 Select **Custom System** and set a domain name, system name, and copyright information.
- Step 4 Click **Advanced**, choose to show or hide the registration entry, and set a browser tab icon and contact information.

If **Registration Entry** is selected, the registration entry will be shown after the user logs in to the customized system, otherwise, it will be hidden.
